Products and services not specifically mentioned in this Bid, but are necessary to provide the functional capabilities described, shall be included as part of the cost elements.

Project Time-Line:

I understand that the County would like to have the project completed as quickly as possible in a quality manner with the least amount of impact on the players.

Once the contractor is selected and the Notice to proceed is processed, I would anticipate some time being available where some work could be completed before the bad weather hits the area. This of course is all weather dependent. Once the weather hits and work stops, I would anticipate (again it is weather dependent) that a mid March or early April time- frame would be reasonable to begin back to work. With the work being completed in the bunkers, it is important that the soil conditions are such that the work being completed does not create more damage from the efforts than the work that is completed. I know that the Golf Course Superintendent would be appreciative of leaving his golf course as undisturbed through this process as possible.

Once the work begins on a steady basis, I would anticipate the project taking 8 to 10 weeks.
